Heba N. Ismail

Backend Software Engineer | Laravel and PHP

Gaza, Palestine | hebanedal224@gmail.com | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Computer Systems Engineering graduate focused on backend development with PHP and Laravel. Project experience includes implementing backend features, database relationships, validation, authorization, and API-oriented workflows. Also developing practical skills in AI-assisted workflows and automation. Seeking backend engineering opportunities and freelance projects.

TECHNICAL SKILLS

Backend: PHP, Laravel, MVC, REST API fundamentals, middleware, authentication and authorization, policies, Form Requests, queues, jobs, listeners, notifications

Databases: PostgreSQL, MySQL, relational database design, Eloquent ORM, relationships, migrations

Frontend and integration: Blade, AJAX, DataTables

Tools: Git, GitHub, Jira, Postman

AI and automation: Zapier, Google Apps Script, GPT for Sheets and Docs, prompt engineering, workflow prototyping

PROJECTS

CMWU Operations System | Graduation Project

Contributed selected backend features and business logic within an existing Laravel and PostgreSQL codebase for a real institutional project. Worked with database relationships, validation, authorization, and API-related workflows as part of a team. Confidential operational details are omitted.

FreelanGo | Educational Freelance Platform

Implemented backend functionality for an educational Laravel and MySQL platform with Admin, Freelancer, and Client roles. Worked on role-aware authentication and access control, CRUD workflows, notifications, and background job/listener patterns. This is a learning project, not a claimed production deployment.

Edukate | Online Courses Platform

Built educational platform features using Laravel, MySQL, and Blade, including role-based dashboards for administrators, teachers, and students, course-related CRUD workflows, and access control.

Workshop Registration Automation | Training Prototype

Designed a prototype workflow using Google Forms, Google Sheets, AI by Zapier, and Email by Zapier. It summarizes learning goals, routes valid registrations and records requiring human review, updates spreadsheet rows, and sends corresponding emails. Confirmation indicates receipt, not acceptance.

EDUCATION

B.Sc. in Computer Systems Engineering | Al-Azhar University – Gaza | 2026

Cumulative average: 95.01% (Excellent); ranked first in graduating cohort. Official graduation certificate pending completion of graduation procedures.

Secondary Education | 2021

99.6%; ranked second nationally in Palestine, Scientific Branch.

TRAINING AND CERTIFICATES

AI and Intelligent Automation Training | Women’s Affairs Center, Gaza | In progress

AI-assisted work and automation workflows; automation module ongoing.

Advanced Laravel | Ahmed Zaqout | 2025

Laravel Fundamentals | Learn More Gaza | 2025

Git and GitHub | almdrasa.com | 2023
